

Mechanical Engineering (Top-Up)

BEng (Honours)

Course Summary

Convert your existing qualifications into a mechanical engineering honours degree.

Develop the techniques to design, analyse, simulate and test mechanical systems.

Enhance your versatility with multidisciplinary insights into mechanical engineering.

Apply your skills by completing industry-linked projects.

Key Information

This course prepares you for diverse engineering roles – with a practice-based approach to mechanical science, design, systems, engineering practice, materials, and manufacture. This top-up award is suitable for students who have a Level 5 qualification (Fd, HND, DipHE) or higher in a relevant discipline and would like to gain a recognised BEng in Mechanical Engineering.

Attendance

Full-time - 1-year course

Part-time - 2-year course

Location

City Campus, within minutes of the train and bus stations
